Subject: Advice on Bird 82 dummy load connector needed  
To: ham-equip@ucsd.edu

Back from the swapmeet this morning with a Bird model 82 500 watt  
dummy load. It has a connector which looks something like an S0-239,  
but larger - about 1" diameter - with rather fine threads. Removed  
the connector (same 4-screw style as a Bird 43 but bigger) and  
discovered a teflon (?) dielectric about 7/8" diameter.

Other than trying to graft something together for this, is an  
adaptor available to convert this to 'N', or a male connector for  
some kind of coax? If you have one you want to sell, please advise...

-----

P.S., I have another big bird dummy load and I thought I could borrow  
the "big"-to-"n" reducer (makes it compatible with regular bird 43 type

quick-change connectors) but unfortunately the '82' is older and doesn't seem compatible (different arrangement of the dielectric and connector components).

Anyway, advice or offer of suitable part for sale would be appreciated.

To: ham-equip@ucsd.edu

A good friend is looking for DRSI cards. Would prefer type I with hf modem but might consider a type II. Please contact via:

Butch Bussen - WA0VJR  
Wallace, KS  
913-891-3532

He has no internet access but I have daily hf contact with him and will pass along any replies sent to me. I may also be reached at 308-635-3223.

Subject: Question about OLD reciever.  
To: ham-equip@ucsd.edu

I have an old U.S.N. CWS-46159 reciever that works, but I haven't any idea how to get power to it, as it has a 12 pin power connector and I have know idea what voltages go where. If some one could be of help I would greatly appreciate it. Thanks.

I also have to agree with Gary. I also own an FT-470 and it is a very  
good radio. Especially for the price! Good luck with your ham experience.
